

MARK HANTON STUDIO.

FORMER PEUGEOT WORKS, CANTERBURY

DETAILS.

markhantonStudio were appointed to provide RIBA work stages 2-3 [Concept Design to Developed Design], for hard & soft landscape works associated with a 539 bedroom student accommodation building.

The overall aspiration for the landscape design is to create a strong contemporary character that reflects Canterbury's historic city influence. Streetscape enhancements are seen as key requirements in this area of the city damaged by highway influences and inappropriate past developments, all within the immediate setting of the medieval City Wall. Sustainability and biodiversity are common threads that inform the landscape design throughout.
